

ClickUp for Grant Management

Grant management is not a simple task for nonprofits. It requires writing head turning proposals, complying with oversight requirements, and regular grant reports and management of grant allocation. Nonprofits need a tool to support this work with timesaving automations.

How does ClickUp help?

-  Create public facing forms for applicants to submit their data.
-  Have a reminder system for both internal and external deadlines, so that grant applications and reports are reviewed by outside legal counsel then submitted to funders on time, every time.
-  View internal and external deadlines to make sure that grant applications and grant reports were submitted to funders in a timely fashion.
-  Track grant application and management tasks through a multi-month process.
-  Scale grant volume upwards as the client base grows, using custom ClickUp Templates for common grant management tasks.
